We can assist in the successful award of monies essential for your revitalization plans. Several innovative financial and remediation techniques are now available to expedite the cleanup of brownfield sites. Investigation and remediation is largely regulated by state environmental agencies in cooperation with the USEPA which, together with the state, can provide some funding for assessment and cleanup of eligible sites.

Our team can contribute to your brownfields development success by supplying the following services that address each of these program elements to the level of detail required by the USEPA:

Brownfield Support Services

- Grant applications and voluntary cleanup program applications
- Area-wide assessments to identify candidate brownfields sites
- Detailed site assessments to quantify possible site contamination
- Community relations plans
- Community involvement activities, such as developing contact lists; issuing fact sheets; conducting or participating in public meetings; and preparing documents such as bulletins and newsletters
- Cleanup level negotiations with regulatory agencies
- Remediation plans that cost effectively address site contamination
- · Remediation services

Groundwater Monitoring

Environmental Consulting Services

- Air quality
- Brownfields redevelopment
- Due diligence CERCLA protection
- Environmental compliance audits
- Expert witness testimony
- Groundwater resources
- Hazardous building materials surveys
- Landfills and burn dumps
- Mining and mineral assessments
- NEPA/CEQA technical studies
- Phase I and Phase II environmental assessments
- Pollution prevention and waste management
- Preliminary Environmental Assessments
- Potentially Responsible Party evaluations
- Regulatory negotiations
- Risk assessments
- School site evaluations
- Site remediation and closure
- Soil and groundwater contamination
- Storage tank services
- Stormwater sampling/analysis
- SWPPP Preparation
- Underground storage tank removal/ assessment
